# Special Issue

# Recent Advances in Prenatal Diagnosis and Maternal Fetal Medicine

## Message from the Guest Editors

Approximately 3% to 5% of pregnancies are complicated by fetal abnormalities, including genetic disorders and birth defects. The rate of preeclampsia in the world is estimated to range from 2% to 10% in healthy, nulliparous women. Prenatal diagnosis pertains to diagnosing fetal structural abnormalities, genetic and chromosomal diseases and pregnancy-related diseases before birth and to calculating risks for pregnancy complications. There are guidelines to calculate highriskSignificant pre-existing medical disorders, such as cardiac, renal, hepatic or other diseases, increase the risk of maternal mortality and morbidity, pregnancy complications and adverse perinatal outcomes. Prepregnancy health, planning pregnancies, multidisciplinary teams and optimizing maternal health during pregnancy can have a positive impact on the mother and neonate. The objective of this Special Issue is to present recent advances in the clinical medicine of prenatal diagnosis and maternal fetal medicine to acquire more knowledge and build confidence in daily practice.

## **About the Journal**

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

## **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
