How Clinicians See the Use of AI in Psychiatry

Message from the Guest Editor

The advent of artificial intelligence (AI) as a practical application in everyday life has brought tremendous opportunities along with potential dangers. We invite researchers, clinicians, and interdisciplinary scholars to submit original research to this Special Issue titled “How Clinicians See the Use of AI in Psychiatry”. This Special Issue aims to explore the transformative role of artificial intelligence (AI) in psychiatric practice, addressing its opportunities and challenges. Against the backdrop of rapid AI advancements, we seek to understand clinicians’ perspectives on integrating AI tools into diagnostics, treatment planning, and patient care. The scope encompasses empirical studies and comprehensive reviews, with a focus on cutting-edge research such as AI-driven predictive models for mental health disorders, natural language processing for therapy chatbots, real-time patient monitoring systems, and ethical frameworks for AI deployment in psychiatry. Submissions should highlight practical applications, clinician acceptance, and potential impacts on patient outcomes, contributing to a nuanced understanding of AI’s role in shaping the future of psychiatric care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
