Research Progress and Challenges in Acute Abdominal Surgery

Message from the Guest Editor

Acute abdominal surgery refers to urgent surgical interventions performed to treat conditions that require immediate management within the abdominal cavity. These conditions can range from acute appendicitis and bowel obstruction to perforated ulcers and traumatic injuries. Acute abdominal surgery is characterized by the need for rapid diagnosis, prompt decision-making, and timely intervention to prevent life-threatening complications. The goal of acute abdominal surgery is to alleviate the underlying condition, relieve pain, restore normal organ function, and prevent further damage. In recent years, minimally invasive techniques such as laparoscopy have revolutionized the field of acute abdominal surgery, allowing for smaller incisions, reduced postoperative pain, and faster recovery. However, despite advancements in surgical techniques and perioperative care, acute abdominal surgery still presents challenges.

- acute abdominal emergencies
- urgent surgical interventions
- minimally invasive techniques
- open surgery
- complications

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
