

## Special Issue

# Recent Concepts in Ovarian Cancer: Epidemiology, Diagnosis, Treatment and Quality of Life

### Message from the Guest Editors

Ovarian cancer (OC) remains the most lethal gynecologic malignancy, largely due to late diagnosis and frequent recurrence. Epithelial ovarian cancer (EOC), the most common subtype, can occasionally metastasize to vital organs. Standard first-line treatment includes cytoreductive surgery combined with platinum-taxane chemotherapy, while advances in personalized medicine, including PARP inhibitors, anti-angiogenic agents, and immunotherapies, are improving outcomes. Surgical innovations like minimally invasive techniques and hyperthermic intraperitoneal chemotherapy (HIPEC) are increasingly part of multidisciplinary care.

Chemotherapy (CT) at the end of life in ovarian cancer patients is a controversial and under-studied topic. Clinicians often lack objective data on which to base themselves when deciding when to stop active treatments. This Special Issue aims to highlight recent advances in diagnosis, surgery, systemic therapies, and personalized treatment for OC, also in later lines. We welcome original research, reviews, and preclinical studies that improve patient outcomes and quality of life, providing an evidence-based overview of current progress and future directions.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
