Clinical and Molecular Diagnosis of Hematologic Malignancies

Message from the Guest Editor

In recent decades, rapid progress in biotechnology and the increasing application of multi-omics studies has largely deepened our knowledge of biological features of hematolymphoid neoplasms. As this great amount of new evidence has been translated into high-throughput molecular diagnostic tools, the diagnostic pattern of hematological malignancies has been profoundly re-shaped, with a deliberate attempt made to prioritize classifying tumor types based on defining genetic abnormalities according to the latest 2022 WHO classification of hematolymphoid tumors. Meanwhile, personalized, targeted treatment based on molecular diagnosis has greatly improved the outcomes of patients with hematolymphoid tumors. In the era of precision medicine, embedding novel molecular findings and multi-omics notions into clinical management is the new goal. This Special Issue aims at providing new insights about the updates in the molecular diagnosis and clinical management of hematolymphoid tumors.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
