

## Special Issue

# Clinical Diagnosis and Treatments of Spinal Tumors

### Message from the Guest Editor

Primary and metastatic tumors of the spine and spinal cord are challenging entities. As targeted treatment for cancer continues to improve survival, more and more patients develop metastases in their spine during the course of their treatment. With advancing technologies and minimally invasive techniques, the treatment paradigms for spinal tumors are continuously evolving. Modern treatments include separation surgery, en bloc resection, minimally invasive instrumentation, stereotactic radiosurgery, laser interstitial therapy, radiofrequency ablation, kyphoplasty, and robotic surgical techniques. To optimize the treatment of our patients, we must be aware of the available treatment options. The multidisciplinary management of spinal tumors has the potential to improve outcomes, survival and quality of life. This Special Issue welcomes advances in the clinical diagnosis and treatment of spinal tumors, including both original research articles and reviews.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
