

## Special Issue

# Clinical Perspectives in Pediatric Surgery: From Neonatal Procedures to Adolescent Care

### Message from the Guest Editors

The development and diffusion of minimally invasive techniques (LAP and RALS) and the focus on the long-term outcome and QoL after the repair of complex congenital malformations represent the main interest in clinical prospective in pediatric surgery. After decades of experience in open and MIS surgery, we can assess the results of our proceedings starting from the neonatal age till adolescence and adulthood, considering mortality, morbidity and, particularly, the effects on different aspects of physical and social life.

Nevertheless there is still a lack of large, multicentric prospective studies on long-term outcome of congenital malformation. In this Special Issue, we would like to define the actual clinical prospective of the main anomalies through expert opinions and systematic reviews. The purpose is to point out where we are, and to present and disseminate the most recent advances and knowledge related to the clinical prospective from newborn to adolescence of the main and complex malformations. I would like to thank in advance all potential authors whose participation will ensure a high scientific standard for this Special Issue.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
