Clinical Advances in Antiphospholipid Syndrome (APS)

Message from the Guest Editor

APS is a thrombo-inflammatory disorder characterized by recurrent thrombo-embolic occurrences and pregnancy complications linked to the presence of circulating antiphospholipid antibodies (aPL)...The condition includes arterial or venous thrombosis, microvascular thrombosis, or recurrent thrombosis resistant to anticoagulants, as well as severe pregnancy complications, up to catastrophic APS, which is a life-threatening condition. APS can affect various organs, leading to a significantly higher rate of damage accrual and disability burden in this young population. The recent ACR/EULAR 2023 classification criteria have increased specificity to 99% to improve patient identification in clinical trials and research, but the potential impact of APS on this young population underscores the need for a high-priority APS research program to guide future updates.

This Special Issue will provide an in-depth exploration of the latest clinical research, challenges, and developments in the understanding and management of APS. As APS continues to pose significant challenges in clinical practice, this Special Issue will highlight diverse perspectives and recent findings in this field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
