

## Special Issue

# Clinical Advances in Spine Disorders

### Message from the Guest Editors

Clinical advances and surgical techniques for the treatment of spine disorders have been effective in minimizing invasiveness and reducing complications. However, there is always a need for improvements in patient outcomes with new understandings of the latest developments in lumbar spine surgery. In this Special Issue "Clinical Advances in Spine Disorders" of the *Journal of Clinical Medicine*, we are interested in providing a comprehensive overview of the latest evolution of emerging conservative treatment and surgical techniques, with a focus on minimally invasive surgery and the use of robotics and navigation systems. We welcome authors to submit their papers in this Special Issue focusing on the newest clinical advances in spine disorders. We hope that it will stimulate interest regarding the unsolved challenges in spine surgery.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
