Clinical Advances in Malaria

Message from the Guest Editor

Malaria control figures are poor, falling far short of the WHO's Global Technical Strategy for Malaria 2016–2030 (GTSM) targets of reducing malaria incidence and mortality by at least 40% by 2020, 75% by 2025 and 90% by 2030, based on the 2015 baseline data. Indeed, the incidence figures were 58.7 in 2020 and 58.4 in 2022, for a reference value of 59.8 cases per 1,000 inhabitants in 2015, and those for mortality 15.2 and 14.3 for a reference value of 15.2 per 100,000 inhabitants. More directly, malaria has been estimated to be responsible for 249 [225–278] million cases and 608,000 [566,000–738,000] deaths in 2022. The endemic is still active in 84 countries worldwide plus French Guyana, but is now essentially African, accounting for 93.6% of cases and 95% of deaths. It also concerns international travelers. As such, all countries in the world are affected. With potential vectors still present, it is likely to reappear in areas where it has been eliminated, as in Greece between 2009 and 2012.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
