Clinical Perspectives on Diagnosis and Treatment of Thyroid Diseases

Message from the Guest Editors

Thyroid diseases arise due to imbalances in thyroid hormone production, leading to either overactive (hyperthyroidism) or underactive (hypothyroidism) thyroid function. Hyperthyroidism results from excessive production of thyroid hormones, leading to symptoms such as weight loss, rapid heartbeat, and anxiety. On the other hand, hypothyroidism occurs when the thyroid gland fails to produce enough hormones, causing fatigue, weight gain, and depression. Other thyroid disorders include thyroid nodules, goiter, and thyroid cancer. Diagnosis of thyroid diseases involves a combination of medical history, physical examination, blood tests, and imaging techniques such as ultrasound or thyroid scans. Regular monitoring, adherence to prescribed medication, and lifestyle modifications are essential for long-term management. This issue aims to collect clinical, experimental, and review studies that improve knowledge in the field of thyroid diseases. We look forward to receiving your contributions to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
