Robotic-Assisted Colorectal Surgery: Advancements and Clinical Applications

Message from the Guest Editor

As in most surgical branches, the robotic approach for colorectal diseases is now commonly used in a majority of our hospitals. The technological advantages of robotic dexterity are well described for technically difficult surgeries, such as low rectal resection and anastomosis. More frequently, the minimally invasive approach is used to redo surgeries such as resection or recanalization after Hartmann surgery. In both benign and malignant diseases, the robotic approach plays an important role. From diverticulitis to rectal cancer, the role in emergency surgery needs to be explored in very selected patients. The cost-effectiveness of the robotic versus laparoscopic approach is still debated. Newly available robotic systems may reduce the operative cost and increase indications for robotics. This Special Issue of the journal aims to comprehensively explore the latest developments in the surgical treatment of colon diseases. Authors can submit original articles, reviews, etc. We encourage submissions of papers on topics surrounding robotic-assisted colorectal surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
