

Special Issue

Intensive Care for Respiratory Diseases

Message from the Guest Editors

Pulmonary medicine has undergone a tremendous transformation in the past years. One of the drivers of this change is the increased acuity of diseases, making the pulmonologist an indispensable team member in intensive care unit (ICU). At the same time, the ICU has significantly broadened the scope of practice. In this special issue, we would like to publish articles that examine this new trajectory. We are looking for manuscripts regarding the intensive care of pulmonary infections, chronic lung diseases and lung malignancies. Furthermore, we are interested in the experiences of pulmonologists working in intensive care with a non-traditional focus, which can include early diagnostics, research, lung transplantation, chronic mechanical ventilation or end of life care. We hope that this publication collection will inspire the next generation of physicians to consider our field of practice and provide guidance for current trends in pulmonary medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
