Acute Kidney Injury: Latest Advances and Prospects

Message from the Guest Editors

Acute kidney injury (AKI) is a complex issue with far-reaching implications, associated with substantial morbidity and mortality rates. By delving into the complexities of AKI, healthcare professionals and researchers can improve patient care and reduce the burden of this condition. This Special Issue aims to explore different aspects of AKI, from various presentation clinical settings to diagnosis and renal replacement therapies, with an eye to future developments and “green solutions”. This Special Issue seeks to stimulate discussion among researchers and clinicians on AKI management, comparing various clinical experiences and comprehensive literature reviews. Every scientific contribution to this Special Issue will enrich the ongoing dialogue on AKI. We invite all interested parties to participate and share their unique viewpoints. AKI is a complex condition that transcends nephrology and impacts the daily work of many healthcare providers. A truly comprehensive understanding of AKI can only be achieved through a multidisciplinary approach.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
