Special Issue

State-of-the-Art Developments in Percutaneous Coronary Intervention (PCI)

Message from the Guest Editor

Though it has been over 40 years since the inception of percutaneous coronary intervention (PCI), PCI is not yet on a par with surgical revascularization for occlusive coronary stenoses. While the adoption of Drug Eluting Stent, high-speed atherectomy, dual-antiplatelet agents, intravascular imaging, and the therapeutic algorithm has contributed enormously to maximizing PCI procedural success, coronary chronic total occlusion (CTO) PCI remains the last frontier of interventional cardiology in terms of procedural success in comparison with non-CTO PCI. Since every coronary artery disease is different, given lesion complexities, patient co-morbidities, and financial equities available in the healthcare system, much more than specialist expertise is needed to successfully treat the condition. While PCI has been proven to improve angina symptoms (an indication justifying the procedure), novel therapies have been developed and implemented with potentially durable, better clinical outcomes. In this Special Issue, we welcome authors to submit papers on the clinical advancements of complex PCI or CTO PCI, thereby improving current indication, technicality, and device application.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
