

Special Issue

Minimally Invasive Treatment with Arthroscopy in Arthropathy

Message from the Guest Editors

Arthroscopic techniques have rapidly evolved with the development of sports medicine. With unique advantages, including minimal invasiveness, fewer injuries of blood vessels and nerves, fewer postoperational complications, faster rehabilitation and shorter operation time, arthroscopic techniques have been increasingly applied in curing disorders of the knee, shoulder, ankle, hip, elbow and wrist joints. As in any evolving field, current information and analysis are subject to change, and evaluations of neo-arthroscopic techniques based on safety and effectiveness are urgently needed. This updated overview explores some of the latest hot topics (e.g., massive rotator cuff tears (MRCT), superior capsule reconstruction (SCR), posterior meniscal root tears (PMRTs), femoroacetabular impingement (FAI), and ankle sprain), technical advancements, and emerging evidence-based studies in arthroscopy. The aim of this Special Issue, therefore, is to provide a stage for outstanding clinical, technical, and epidemiological contributions describing recent advances that can lead to improvements in diagnosis, treatment, and prognosis in the use of arthroscopic techniques.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
