Clinical Advances in Surgical Treatment for Hepato–Pancreatic–Biliary (HPB) Diseases

Message from the Guest Editor

The field of hepatopancreaticobiliary (HPB) surgery has seen significant achievements in recent years, driven by innovations in surgical techniques, imaging, minimally invasive approaches, and perioperative care. These advances have improved outcomes for patients with complex HPB diseases, including liver, pancreatic, and biliary tract disorders. Minimally invasive techniques, including laparoscopic and robotic surgery, have revolutionized HPB surgery by reducing postoperative pain, shortening hospital stays, and improving cosmetic outcomes. In our forthcoming special issue, "Clinical Advances in Surgical Treatment for Hepato–Pancreatic–Biliary (HPB) Diseases" our goal is to deliver insightful updates on the surgical and multidisciplinary care necessary for patients with pancreas, biliary system, and liver-related diseases. We aim to emphasize evolving therapies and evidence-based methods to best treat the diverse spectrum of conditions that affect this region.

Guest Editor

Dr. Spiros G. Delis

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
