Advances in Anticoagulant and Antiplatelet Therapy for Coronary Artery Disease

Message from the Guest Editor

Coronary heart disease (CAD) is one of the most threatening cardiovascular diseases to human health. How to choose the best antithrombotic regimen has always been the focus of clinical research. Patients requiring combined anticoagulation and antiplatelet therapy are clinically difficult to manage, and the management of CAD patients with complex clinical features remains demanding due to the risk of ischemic and bleeding events, due to multiple comorbidities and/or complex interventional procedures. Therefore, consensus and clinical updates on antithrombotic therapy in patients with acute coronary syndrome and/or percutaneous coronary intervention needing oral anticoagulation, such as those with atrial fibrillation, are particularly important. This Special Issue focuses on the problems in the clinical practice of anticoagulation and antiplatelet therapy in patients with different types of CAD and CAD complicated with AF, which is of great significance for guiding clinicians in diagnosis and treatment. We welcome contributions to these and related topics, including original research and commentary to inform readers of the latest progress.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
