Special Issue

New Insights into the Diagnosis and Treatment of Temporomandibular Joint Diseases

Message from the Guest Editor

The temporomandibular joint (TMJ) can be remodelled even after growth has stopped, allowing it to undergo structural changes and adapt to different physiological demands. Temporomandibular disorders (TMDs) are a group of degenerative disorders involving the components of the TMJ, and can lead to displacement of the disc, joint remodelling, and eventually, osteoarthritis. Different methods of diagnosing and treating TMDs have been described in the literature. The aim of this Special Issue is to update the information on methods of TMD diagnosis, from clinical exams to immunohistologic and molecular diagnosis, and on novel treatments for this disease; these include noninvasive techniques such as physical therapy, ultrasound, low-level laser therapy, and splints; minimally invasive techniques such as corticosteroid injections, arthrocentesis of the joint (with or without platelet-rich plasma or hyaluronic acid injections), and arthroscopic surgery; and invasive procedures for advanced stages of TMDs, which include discectomy, disc replacement, and total joint replacement.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
