The Role of Scleral Lenses in the Management of Eye Disease

Message from the Guest Editor

The popularity and availability of scleral lenses for the treatment of corneal disease have expanded remarkably over the past 20 years. Patients who formerly faced surgery as the only option for corneal disease can now put off the “inevitable” through the improved visual correction of scleral lenses. Other patients who faced vision loss or significant disruption to their quality of life due to an exposed cornea can now regain functional vision and ocular comfort through the use of scleral lenses. Corneas that could no longer tolerate other lens modalities have found renewed hope with scleral lenses. New technologies have also been developed to enhance the fitting of scleral lenses; ocular surface topographers and correction of higher-order aberrations are expanding the possibilities with this lens design. This Special Issue focused on scleral lenses aims to promote a greater understanding of the role scleral lenses can play in eye care and hopes to examine new designs and new research that helps to improve the lens fitting and wearing experience.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
