

## Special Issue

# The Role of Scleral Lenses in the Management of Eye Disease

### Message from the Guest Editor

The popularity and availability of scleral lenses for the treatment of corneal disease have expanded remarkably over the past 20 years. Patients who formerly faced surgery as the only option for corneal disease can now put off the “inevitable” through the improved visual correction of scleral lenses. Other patients who faced vision loss or significant disruption to their quality of life due to an exposed cornea can now regain functional vision and ocular comfort through the use of scleral lenses. Corneas that could no longer tolerate other lens modalities have found renewed hope with scleral lenses. New technologies have also been developed to enhance the fitting of scleral lenses; ocular surface topographers and correction of higher-order aberrations are expanding the possibilities with this lens design. This Special Issue focused on scleral lenses aims to promote a greater understanding of the role scleral lenses can play in eye care and hopes to examine new designs and new research that helps to improve the lens fitting and wearing experience.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
