

Special Issue

Foot and Ankle Surgery: Clinical Challenges and New Insights: 2nd Edition

Message from the Guest Editor

It is my pleasure to invite you and members of your research group to submit an article for a Special Issue titled "Foot and Ankle Surgery: Clinical Challenges and New Insights: 2nd Edition". This is a new volume, and we published more than five papers in the first volume. For more details, please

visit https://www.mdpi.com/journal/jcm/special_issues/99I319O8I0. The incidence of foot and ankle disorders in the orthopedic field is rapidly increasing, and new treatment strategies are continuously required. The aim of this Special Issue is to provide current concepts and new insights into the surgical treatment for hallux valgus deformity, chronic ankle instability, and severe ankle arthritis. Evidence-based comprehension regarding these three most common problems can significantly improve the clinical outcomes and prognosis. Therefore, researchers in the field of foot and ankle surgery are encouraged to submit the current concept reviews to this Special Issue.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief
