Current Update and Perspectives in Corneal Disorders

Message from the Guest Editors

In recent years, the development of new treatments for corneal disease has been remarkable. The introduction of lamellar surgery worldwide dramatically increased the number of corneal transplants by a reduction of intraoperative and postoperative complications and an enlargement of indication. In this Special Issue, we welcome authors to submit papers on the surgical advances and innovations of corneal surgery, the safety, efficacy, predictability and stability of results obtained with different approaches. Furthermore, we encourage reports of long-term postoperative outcomes comparing different surgical techniques. The reports concerning the use of new diagnostic instruments and innovative laboratory approaches will be also of great interest. **Keywords**

- corneal surgery
- cornea clinic
- keratocounus
- corneal cross-linking
- DALK
- DSAEK

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
