Urological Oncology: New Insights into Diagnosis and Treatment

Message from the Guest Editor

Urological oncology is a constantly evolving field. Each year brings forward new insights into diagnostic methods and treatment approaches, encompassing surgical techniques, chemotherapy, immunotherapy, and radiotherapeutic strategies, which significantly influence clinical practice and shape guideline recommendations.

The scope of these innovations is consistently focused on maximizing benefits related to oncological outcomes, including overall survival, recurrence-free survival, quality of life, functional outcomes, among others. Precision in diagnostic methods is continually improving, as seen in techniques such as MRI-ultrasound prostate fusion biopsy, MRI in muscle-invasive cancer, and prostate cancer diagnosis. Surgical techniques have made significant progress over the past decade, with a focus on minimally invasive procedures that seek to achieve precise treatment while preserving function.

This Special Issue is dedicated to publishing contributions centered around innovative strategies in the diagnosis and treatment of urinary tumors, contributing to the growing body of evidence in the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
