Hepatobiliary and Pancreatic Surgery: Management and Future Opportunities

Message from the Guest Editor

Hepatobiliary and pancreatic surgery is probably the most versatile and demanding surgery in upper GI procedures. Although survival has improved dramatically in the past decade, complication rates remain at rather high levels. The introduction of minimally invasive surgery in pancreatic surgery, mainly triggered by improvements in robotic surgery, has demonstrated its feasibility but failed to decrease the rate of pancreatic fistula, bile leakage, and vascular complication rates. From a surgical point of view, there are high expectations regarding the future development of robotic-assisted surgery in HPB procedures. This Special Issue of the Journal of Clinical Medicine aims to attract original research articles and reviews on the latest aspects of HPB surgery, especially in terms of clinical experiences, improvements for HPB cancer patients, and innovative treatment options in order to reduce or treat perioperative complications to improve long-term survival.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
