Rehabilitation and Recovery from Orthopedic Trauma

Message from the Guest Editor

Musculoskeletal trauma and disorders are one of the leading causes of disability. These disorders are responsible for patient suffering and have enormous economic impact. The aim of this special collection of manuscripts is to focus on musculoskeletal trauma and disorders, and their recovery. Basic science and translational clinical research articles are welcome. We also invite articles with broad relevance to this topic as we are focused more on scientific excellence and rigor. We hope to publish articles from different facets of musculoskeletal medicine and rehabilitation. Sincerely,

Guest Editor

Prof. Dr. Nitin B. Jain

Department of Physical Medicine and Rehabilitation, University of Texas Southwestern, Dallas, TX, USA

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
