Advances in Rhinosinusitis and Nasal Polyposis: From Emerging Trends and Therapeutic Opportunities to Surgery

Message from the Guest Editors

Chronic rhinosinusitis with nasal polyps (CRSwNP) is an inflammatory condition, the most prevalent symptoms of which include nasal obstruction, nasal and postnasal discharge, an abnormal sense of smell, and facial pain. In those patients whose symptoms cannot be clinically controlled with appropriate medical therapy, endoscopic sinus surgery (ESS) provides a beneficial alternative treatment. The analysis of different aspects of the appearance of nasal polyps—at both cellular and molecular levels—in addition to different surgical approaches and the outcomes associated with new treatments (monoclonal antibodies) in the context of precision medicine, constitute the current and future routes of study in this field. Particular attention should be paid to anatomical variations in the nose and paranasal sinuses, which must be identified radiologically and which could influence the long-term results of biological therapy. If present, surgical treatment may be necessary.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
