Pediatric Otorhinolaryngology: Recent Breakthroughs and Future Perspectives

Message from the Guest Editors

The treatment of pediatric otorhinolaryngological disorders is progressively shifting towards minimally invasive surgery across various disciplines (airway surgery, ear surgery, and salivary glands surgery). This approach emphasizes a multidisciplinary treatment approach involving neonatologists, pediatricians, anesthesiologists, and pediatric surgeons, who all must work collaboratively to achieve a comprehensive diagnostic workup for young patients. Technological advancements, particularly in the realm of visualization tools like 4K endoscopy, 3D 4K exoscopy, and novel image-guided surgery, have facilitated the transition from traditional invasive surgery to less invasive modalities for managing otorhinolaryngological conditions in children. To further explore and enhance our understanding of these advancements, we invite authors to contribute to this Special Issue of the *Journal of Clinical Medicine* (PubMed indexed) with articles centered around various aspects of pathogenesis, diagnosis, and treatment of otorhinolaryngological disorders in children.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
