Cystic Fibrosis: Diagnosis and Treatment

Message from the Guest Editors

You know better than us that cystic fibrosis is an important genetic disease caused by a myriad of CFTR gene mutations and that the sweat chloride test, genetic testing, prenatal/preconception testing, and newborn screening are different ways to obtain a diagnosis. In recent years, novel drugs have dramatically changed the symptoms and, therefore, the lives of many cystic fibrosis patients who are allowed to take them. Moreover, the median age of treated patients is reducing over time thanks to new legislations. What's more, a lot of patients without F508del will hope to be allowed to take these new medications. In this Special Issue, we welcome original articles, reviews, brief reports about the diagnosis, treatment, and management of cystic fibrosis.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
