Neck Pain: Advancements in Assessment and Contemporary Management

Message from the Guest Editor

Neck pain is a complex and prevalent issue, significantly affecting the quality of life of millions of individuals.

Rapid progress is being made in the field of neck pain, leading to improvements in the clinical assessment and management of patients. Advancements in our understanding of the pathophysiological mechanisms underlying various neck pain phenotypes have broadened our scope for clinical assessments, moving beyond traditional diagnostic methods such as imaging and physical examination. Contemporary management approaches have evolved to encompass a multidisciplinary model that recognises the importance of the biopsychosocial aspects of neck pain.

Treatments, including physical therapy, pain management interventions, and pharmacological management. Additionally, non-pharmacological interventions, such as psychologically informed therapy, have gained prominence in addressing the psychosocial aspects of neck pain. In this Special Issue, we invite authors to contribute research papers highlighting the latest advancements in neck pain assessment and contemporary management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
