

Special Issue

Kidney Transplantation: Challenges, Advances and Lessons Learnt

Message from the Guest Editors

Kidney transplantation remains a crucial and expanding topic in nephrology and transplant medicine, with major advances and ongoing challenges. This Special Issue, "Kidney Transplantation: Challenges, Advances and Lessons Learnt", aims to investigate major discoveries, ongoing challenges, and the wealth of knowledge gained through decades of clinical practice and research. This Special Issue seeks to provide a complete review of the present state of kidney transplantation by focusing on a variety of themes such as patient selection criteria, immunosuppressive treatments, long-term graft survival, and the complexities of multi-organ transplant consideration. We hope to inform and encourage continuing progress toward better patient outcomes and transplant success by highlighting cutting-edge research, expert opinions, and practical experience lessons.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
