# New Concepts in the Diagnosis and Treatment of Orthopedic Diseases in Children—2nd Edition

### Message from the Guest Editors

Pediatric orthopedic diseases present unique challenges and require specialized approaches to ensure effective management and positive outcomes for young patients. We invite contributions that cover a broad range of topics, including but not limited to: Advanced imaging techniques and their applications in pediatric orthopedics. Novel surgical techniques and minimally invasive procedures; Recent developments in non-surgical treatments and rehabilitation; Case studies and clinical trials showcasing new therapeutic approaches; Long-term outcomes and quality of life assessments for pediatric orthopedic patients. We invite you to visit our website to access the first volume of our Special Issue:

[https://www.mdpi.com/journal/jcm/special\\_issues/931LT5JMJV](https://www.mdpi.com/journal/jcm/special_issues/931LT5JMJV) Our goal is to create a comprehensive collection of articles that will serve as a valuable resource for clinicians, researchers, and healthcare professionals involved in the care of children with orthopedic conditions. We look forward to your participation. For more information, please click here.
