Novel Insights into the Clinical Management of Retinal Detachment

Message from the Guest Editor

Significant advancements have been made in understanding the mechanisms behind retinal reattachment, the role of tamponade agents, and different surgical techniques (e.g., pars plana vitrectomy, scleral buckle, and pneumatic retinopexy) influencing visual outcomes. To explore these developments, I am pleased to invite you to contribute to this Special Issue of *Journal of Clinical Medicine*, entitled "Novel Insights into the Clinical Management of Retinal Detachment". This Special Issue will highlight recent progress in the management of retinal detachment. We welcome original research, systematic reviews, and clinical studies exploring innovative surgical techniques, imaging modalities, risk factors, and post-operative outcomes. Additionally, we encourage discussions on emerging techniques and challenges in complex cases. By bringing together leading experts, we aim to provide a comprehensive overview of current best practices and future directions. Your expertise would represent a valuable addition to this collection. We look forward to receiving your contributions and insightful perspectives.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
