## Special Issue

## Clinical Diagnosis and Treatment for Spinal Disorders

## Message from the Guest Editors

Recently, the importance of spinal diseases has been widely recognized, either in terms of quality of life or because of their high prevalence. Spinal diseases are based on age-related degeneration of the spine, it is a well-known fact that spinal degeneration does not immediately mean symptoms. Therefore, contrasting imaging findings with clinical symptoms is important and functional diagnosis is also important. In addition, advances in diagnostic imaging technology using CT-FEM (CT-based finite element method), AI (artificial intelligence), XR (extended reality) technology and wearable sensors, all of which have been driven by the recent digital transformation, will provide further breakthroughs in the diagnosis and treatment of spinal disorders. Advances in these technologies are expected to transform not only diagnosis and treatment but also traditional surgical education. In this Special Issue, we are seeking the latest knowledge in the diagnosis and treatment of spinal disorders, including education for surgery. We welcome original articles and reviews of current diagnostics and treatments for spinal disorders that may lead to future clinical research.

#### **Guest Editors**

Prof. Dr. Koji Otani

Department of Orthopaedic Surgery, Fukushima Medical University School of Medicine, Fukushima 960-1295, Japan

### Dr. Tadatsugu Morimoto

Department of Orthopaedic Surgery, Faculty of Medicine, Saga University, 5-1-1 Nabeshima, Saga, Japan

## About the Journal

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
