

## Special Issue

# Advances in Male Infertility: Diagnosis, Management and ART Integration

### Message from the Guest Editors

This Special Issue, entitled "Advances in Male Infertility: Diagnosis, Management and ART Integration," seeks to highlight cutting-edge research and clinical innovations that are transforming our understanding and treatment of male reproductive dysfunction. The Special Issue will explore breakthroughs in genetic and epigenetic testing, hormonal profiling, and advanced semen analysis, offering novel insights into the identification of both overt and subclinical etiologies. Emphasis will be placed on the role of personalized treatment strategies. Additionally, the Special Issue will address emerging sperm selection and preservation techniques, including the use of microfluidics, magnetic-activated cell sorting (MACS), and cryopreservation innovations. Importantly, this Special Issue will also welcome contributions on emerging frontiers, such as stem cell therapy, exosome-based diagnostics, and the potential of gene editing to restore spermatogenesis. By fostering a multidisciplinary perspective—bridging urology, andrology, endocrinology, genetics, and reproductive medicine—this Special Issue aims to promote a more integrated and translational approach to male infertility care.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
