Glomerulonephritis: Current Diagnosis, Treatment and Future Options

Message from the Guest Editors

Glomerulonephritis is a complex and challenging condition affecting the kidneys, being the cause of ESRD in up to 30% of patients reaching RRT and causing an enormous impact on patients and a burden for the health system. This Special Issue aims to explore the significant advancements in the diagnosis and management of distinct glomerulonephritis made in recent years. The topics of interest for publication include, but are not limited to, the latest diagnostic techniques used to identify glomerulonephritis. Additionally, we are interested in hearing about the various treatment options available for patients with glomerulonephritis. Furthermore, we are excited to learn about any promising future treatments or research developments in the field of glomerulonephritis. This could include novel drug therapies, emerging technologies, or potential genetic factors influencing the disease.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
