Advanced Techniques for the Treatment of Complex Coronary Artery Disease

Message from the Guest Editor

Advanced techniques have changed our way of thinking about indications for coronary revascularization. In addition, the large sharing of operator experiences with several studies and international conferences, growing the operator skills advancing the limits of successful percutaneous procedures. These have also reduced the failure of percutaneous revascularization procedures, resulting in improved patient outcomes. Not least, the important knowledge about pharmacotherapy pathways in patients with coronary artery disease helped to solidify these results in short and long terms outcomes. In light of this evidences born the importance to share the investigation results on the treatment of complex coronary artery disease scenario to improve the revascularization and clinical outcomes. I am pleased to invite you to contribute to this Special Issue on “Advanced Techniques for the Treatment of complex Coronary Artery Disease”. The aim is to present original research clinical studies as well as state-of-the-art reviews focused on complex coronary artery disease treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
