

## Special Issue

# Clinical Management of Patients with Multiple Sclerosis (MS)

### Message from the Guest Editor

Multiple sclerosis (MS) is a disease of the central nervous system with a wide variety of symptoms and different disease courses. The comprehensive management of MS typically involves the treatment of acute relapses and of the course of the disease, symptoms management, motor and cognitive rehabilitation programs, and support in the psychosocial dimension. This Special Issue aims to comprehensively explore the world of clinical management for people with MS. It could serve as a source for in-depth clinical updates and discussions on the current challenges of MS. The themes of this Special Issue span from treatment with disease-modifying therapies to motor and cognitive rehabilitation strategies, as well as the evaluation and management of psychosocial dimensions of living with MS. Additionally, it focuses on the need for multidisciplinary approaches, favoring an interdisciplinary dialogue. Furthermore, along with other aspects, the focus on patient-reported outcomes and the use of telemedicine are useful for monitoring people with MS and for 'bringing them closer' to their neurologist. They represent essential steps towards personalized medicine and a holistic approach to MS.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
