Special Issue

Optimized Diagnosis and Treatment for Lumbar Degenerative Disc Disease

Message from the Guest Editors

Lumbar spinal disorders are common and lead to substantial morbidity and loss of productivity in society. In recent years, diagnostic imaging of the lumbar spine has made great strides, such as improvements in radiography, CT/MRI fusion imaging and whole-body bone X-ray. Advances in these spinal diagnostic imaging techniques will lead to further progression in identifying their causes and treatment methods. Fields such as computer-assisted surgery and diagnostic imaging using AI (artificial intelligence) are expected to develop further in the future. Further research is desirable to establish breakthrough discoveries and treatments for lumbar spinal disorders.For this Special Issue, we invite submissions that focus on lumbar spinal degeneration, the pathophysiology and treatment of degenerative disc disease and minimally invasive lumbar spinal surgery. Submissions can be in the form of original research that addresses key questions in spinal care. Spinal disorders are diverse in their presentation, treatment and outcomes; thus, any submission relating to spinal disorders will be considered.We look forward to receiving your submissions.

Guest Editors

Dr. Marc Dreimann

Prof. Dr. René Hartensuer

Deadline for manuscript submissions

closed (30 November 2024)

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
