Bruxism and Temporomandibular Disorders: Current Advances and Future Challenges

Message from the Guest Editors

We are pleased to invite you to contribute to our upcoming Special Issue on “Bruxism and Temporomandibular Disorders: Current Advances and Future Challenges”. Bruxism and temporomandibular disorders affect a significant portion of the population. The global prevalence of sleep bruxism is 21%, while awake bruxism affects 23% of individuals. For temporomandibular disorders, the prevalence reaches 34%. These conditions remain a compelling topic for both researchers and clinicians and are characterized by a multifactorial etiology. As such, a multidisciplinary approach is essential to facilitate a quicker diagnosis and appropriate patient treatment. This Special Issue aims to summarize the current state of knowledge regarding bruxism and temporomandibular disorders and outline future directions for diagnosis and therapy.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
