Gastric Cancer: Diagnosis, Treatment and Prevention

Message from the Guest Editor

Gastric cancer is the third common cancer in cancer deaths worldwide. However, it has undergone revolutionary changes in recent years with the establishment of early detection and diagnosis, early treatment, and preventive medicine. With regard to diagnosis, the remarkable development of diagnosis with image enhancement endoscopy and magnified endoscopy has made it possible to detect early gastric cancer. In addition, the emergence of artificial intelligence has the potential to change endoscopic diagnosis in the future. In terms of treatment, minimally invasive treatment including endoscopic treatment, such as endoscopic submucosal dissection, is attracting attention. With regard to prevention, *Helicobacter pylori* eradication is still the most important factor. Data from medical checks and screening are also important because the early detection of gastric cancer clearly improves the prognosis of patients.

In this Special Issue, we welcome submissions on topics related to the diagnosis, treatment, and prevention of gastric cancer.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
