

Special Issue

State-of-the-Art in Dental Imaging for Orthodontics

Message from the Guest Editor

Radiographic images in orthodontics and other branches of dentistry, such as oral surgery, implantology, periodontics and rehabilitation, help us determine what type of pathologies we can detect and how to solve them. In addition, it is necessary to know what the different current radiological techniques are and what we must diagnose and develop a correct treatment plan for in orthodontics and other branches of dentistry. This Special Issue will allow us to discover new ways of approaching related problems in dentistry using radiographic images and photography. I invite you to participate by providing interesting articles related to images in dentistry.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
