

Special Issue

Diagnosis and Prognosis of Myocardial Infarction

Message from the Guest Editor

This Special Issue aims to shed light on the issues faced by patients suffering from myocardial infarction, explored via different cardiac imaging techniques and within different age classes. An in-depth understanding of the imaging aspects of myocardial infarction presentation, using new techniques both in cardiac magnetic resonance and cardiac CT, can help indicate the appropriate drug management, minimize complications and aid in faster recovery. The current Special Issue outlines state-of-the-art research, including translational and clinical work focusing on different aspects and various ages of presentation of myocardial infarction. Indeed, myocardial infarction may also occur at a young age in various clinical contexts. Using an appropriate imaging technique for patients may help achieve optimal clinical diagnosis. We are delighted to accept manuscripts of original research (including communications) focusing on imaging and clinical studies, and review articles on different myocardial infarction presentations, exploring new categories, gender differences and imaging characterization related to this field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
