Cardiovascular Health in Pregnancy and the Off-Spring

Message from the Guest Editors

High-risk pregnancies are a common public health problem. Fetal programming is major issue in this field. Theory suggests that environmental influences during fetal development have a critical impact on health and disease development across the lifespan. Lifestyle, psychosocial, environmental and genetic factors could all lead to health issues and cardiovascular sequelae. Successful interventions to reduce physical inactivity, unhealthy nutrition, and sedentary behavior have the potential to positively affect maternal and fetal health in pregnancy and in the health of offspring. In addition, fetal congenital heart disease and fetal arrhythmia are still main topics of cardiovascular medicine. In this Special Issue we would like to focus on these topics in maternal and fetal health during pregnancy and in the health of offspring.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
