Symptoms and Treatment of Parkinson's Disease

Message from the Guest Editors

Parkinson's disease represents a major cause of neurodegeneration with an everincreasing worldwide prevalence. Recent research has focused on the individualized assessment of motor and non-motor symptoms. Device-aided remote monitoring has facilitated the in-depth evaluation of Parkinson's disease symptomatology and distinct phenotypes. Moreover, the new developments within the field of genetics have increased our understanding on Parkinson's disease pathogenesis. Underrepresented populations are in the spotlight of Parkinson's disease research, so as to expand our knowledge of this complex disorder. On the other hand, new biomarkers including alpha-synuclein seeding assays and innovative imaging techniques have revolutionized Parkinson's disease diagnosis. Additionally, novel therapies, both symptomatic and disease modifying, are being developed and implemented. Device-aided treatments play a crucial role in the current therapeutics of this disorder. In this Special Issue, we welcome authors to submit papers concerning the clinical advancement of Parkinson's disease in terms of both diagnosis and treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
