

## Special Issue

# Malignancies of the Genitourinary System: Current Update and Perspectives

### Message from the Guest Editors

Genitourinary malignancies are a heterogeneous group of diseases linked by anatomical and physiological function, but are different in almost every aspect of pathophysiology, molecular biology, prognosis and treatment. This Special Issue of *Journal of Clinical Medicine* presents the up-to-date summaries related to the pathogenesis, diagnosis, prognostic assessment, and management of the most common malignancies of genitourinary origin: kidney, prostate, bladder/urothelium and testicle. Effective treatment of these malignancies most often involves a combination of surgery, radiotherapy, chemotherapy, hormone therapy, immunotherapy, and targeted therapy. Hence, we treat this Special Issue as multidisciplinary and aim to target a broad audience, including oncologists, urologists, pathologists and translational researchers. We welcome prospective, retrospective, and review studies and interesting case reports which address tumor pathogenesis, diagnostic challenges, advances in therapeutics, prognostic and predictive biomarkers, and treatment complications.

### Guest Editors

Dr. Minghao Zhong

Department of Pathology, Yale University School of Medicine, New Haven, CT, USA

Dr. Gang Wang

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
