Non-invasive Respiratory Support: How to Get It Right in Clinical Medicine—Volume I

Message from the Guest Editor

The importance of non-invasive respiratory therapies has been highlighted during the COVID-19 pandemic. The use of this treatment in all areas of the hospital has rapidly increased. This Special Issue aims to collect the latest approaches and findings, as well discuss current challenges in the provision of respiratory support (non-invasive ventilation with or without oxygen and high flow therapy) with regard to patient selection, initiation and telemedicine applications. Where applicable, case examples will be presented in addition to real data, aiming to assist the reader with their clinical practice. The focus is on getting it right in patient diagnosis and should include a focus on new modes and strategies of respiratory support. Potential topics include, but are not limited to:

Domiciliary high flow therapy;

Monitoring requirements for home mechanical ventilation;

The ventilator, modes and settings for home mechanical ventilation;

What circuit, mask and filters should be used in home mechanical ventilation;

Oxygen distribution with respiratory support devices in the hospital and home;

Hospital versus outpatient versus home initiation of ventilatory support.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
