

## Special Issue

# Advances in the Personalized Management of Chronic Obstructive Pulmonary Disease (COPD)

### Message from the Guest Editors

Chronic obstructive pulmonary disease (COPD) represents a major burden for healthcare systems worldwide. Potential reasons include underdiagnosis in multiple parts of the world and the need for novel treatments beyond the currently available inhaled combinations of long-acting muscarinic antagonists (LAMAs), long-acting  $\beta_2$ -agonists (LABAs), and inhaled corticosteroids (ICSs). Modern diagnostic techniques, including the use of artificial intelligence (AI) in spirometry, oscillometry, novel imaging techniques, and the use of biomarkers, have advanced the phenotyping and endotyping of COPD patients. The proper identification of individual characteristics of COPD patients represents the basis for proper personalized management. This Special Issue welcomes original research and review papers on recent diagnostic and therapeutic options that may advance the personalized management of COPD patients.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
