Special Issue

Advances in the Personalized Management of Chronic Obstructive Pulmonary Disease (COPD)

Message from the Guest Editors

Chronic obstructive pulmonary disease (COPD) represents a major burden for healthcare systems worldwide. Potential reasons include underdiagnosis in multiple parts of the world and the need for novel treatments beyond the currently available inhaled combinations of long-acting muscarinic antagonists (LAMAs), long-acting ▯-agonists (LABAs), and inhaled corticosteroids (ICSs). Modern diagnostic techniques, including the use of artificial intelligence (AI) in spirometry, oscillometry, novel imaging techniques, and the use of biomarkers, have advanced the phenotyping and endotyping of COPD patients. The proper identification of individual characteristics of COPD patients represents the basis for proper personalized management. This Special Issue welcomes original research and review papers on recent diagnostic and therapeutic options that may advance the personalized management of COPD patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
