

## Special Issue

# Latest Advances in Clinical Diagnosis and Treatment of Hip and Knee Osteoarthritis

### Message from the Guest Editor

Degenerative osteoarthritis of the hip and knee joints represents an enormous socioeconomic burden for all humankind. Despite intensive scientific efforts, prophylactic therapy to prevent the development of osteoarthritis is not currently available. Accordingly, current therapeutic strategies usually aim at treating the damage that has already occurred.

Localized damage can be addressed very well with regenerative procedures. Appropriately differentiated and accurate preoperative imaging can pave the way for this.

For terminal degenerative changes, endoprosthetic replacement is still considered the gold standard.

This Special Issue is dedicated to the latest findings in the development, diagnosis and therapy of degenerative joint diseases, especially of the hip and knee joint. We would like to invite authors to support us with original articles or reviews including, but not limited to, the following topics: Pathomechanisms for the development of osteoarthritis; Imaging in degenerative joint disease; Joint-preserving therapy options for degenerative joint diseases of the hip and knee; Joint Replacement of hip and knee.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
